**UNIBIT® STEP DRILL BITS**

Constructed of industrial grade high speed molybdenum steel and heat treated to assure maximum durability. Easy to sharpen non-skid tip eliminates skidding and the need for center punching. The tip gives sure starts even on curved surfaces. The single fluted cutting edge helps assure true round holes and allows greater control. As many as 13 different hole sizes in a single bit eliminates the need to maintain a tool box full of specific size drill bits. Flattened shank prevents slipping in drill chuck. Sizes are laser marked on each bit. Used for plastics, no need to deburr.
